Subject: FNSB GIS Data inquiry

Hello,

The aerial imagery listed on the [Get FNSB GIS Data](#) webpage is available to the public, and once it is acquired, it can be used in the public domain.

If you are interested in using our Imagery rest services, they are available here:

<https://gisportal.fnsb.gov/image/rest/services>. If you are interested in our GIS Layer REST services (which includes building outline data), they are available here: <https://fnsb.gov/1108/FNSB-GIS-Layer-REST-Services>

There is a process that is required if you want your own copies of the larger imagery items that are available, which is all explained in detail on the [Get FNSB GIS Data](#) webpage.

In summary though, a [data acquisition form](#) must be filled out and submitted. Also, a data acquisition fee must be paid. The fee can be paid over the phone, with a credit card, through the Community Planning Department (907-459-1260). Or a check or money order can be sent.

Send check or money order, paid to the order of: Fairbanks North Star Borough, along with the completed [data acquisition form](#) to:

Fairbanks North Star Borough
Department of Community Planning
907 Terminal Street
Fairbanks, AK 99701

Finally, since the Pictometry imagery mosaic items from 2023, 2020 and 2017 are too large in size for us to send them via the internet, a customer provided storage device (with enough storage for the imagery item requested) must be dropped off at the Fairbanks North Star Borough Administrative Building (907 Terminal St, Fairbanks, AK), or a customer provided storage device must be sent to the address shown above, along with a prepaid return shipping label. If you send a customer provided storage device, be sure to send the [data acquisition form](#) with it, and add a label of some sort, to the device, so that we know who it belongs to. If the device is shipped to us, we will use the prepaid shipping label to ship it back, once the requested data is copied onto it. We will also send an email or call whatever contact information is on the [data acquisition form](#), notifying that the data has been copied to the device and that it is being shipped back.

I know that was a lot of information, so of course, if you have any questions, let me know. I will actually be out of the office on Monday (July 29th), so if you send an emails to me, I likely won't get them until Tuesday (July 30th).

-Bryn
