[REDACTED],

Thank you for your inquiry on the TDOT imagery products. The products are public domain.

Thank you and we hope this is helpful.

-Team TNMap

Hi,

I am a volunteer of [OpenStreetMap](#), a collaborative open project to create a global geodata set freely usable by anyone on share-alike and attribution terms under the [Open Database License \(ODbL\)](#).

We're very interested in using your TDOT imagery to improve the map. Contributors to OpenStreetMap will only be using this imagery to create trace features such as roads and buildings. In order to facilitate this, we want to confirm with you whether or not this imagery is considered to be in the public domain or if OpenStreetMap contributors could have explicit permission to use this imagery.

Thank you for your consideration. If you have any questions or would like more information about OpenStreetMap, please do not hesitate to contact me by e-mail.

Regards,

[REDACTED]
